

# **Software In Motion**

Continuous Delivery for Mobile

David Truxall, Ph.D.

#### **About Me**

@davetrux

http://blog.davidtruxall.com

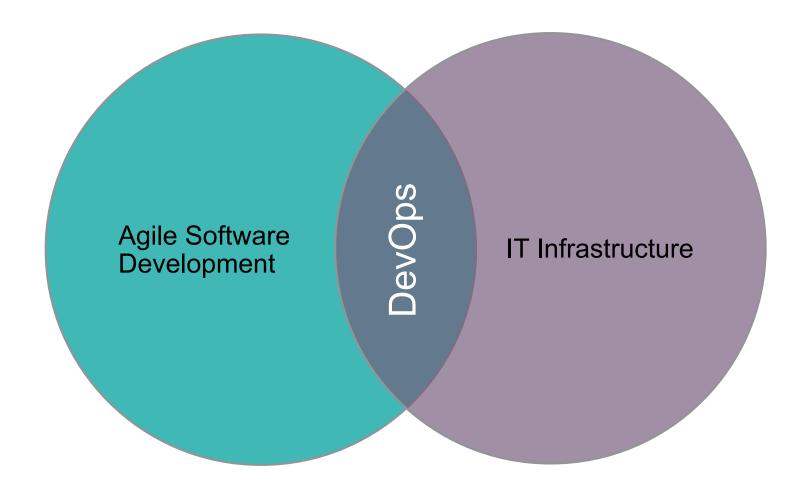

## **Agenda**

- 1. Concepts
- 2. Build tools
- 3. Platform examples
- 4. Testing
- 5. Deployment

# **DevOps**

#### **Concepts**

- –Continuous Integration
  - Build the app regularly
  - Know when the app is compiling or broken
  - -Fail early
  - Happens more often than you would imagine

- Continuous Delivery
  - App is constantly tested
  - Deliverable to production at any time
  - Automated deployment

#### **Mobile Problems**

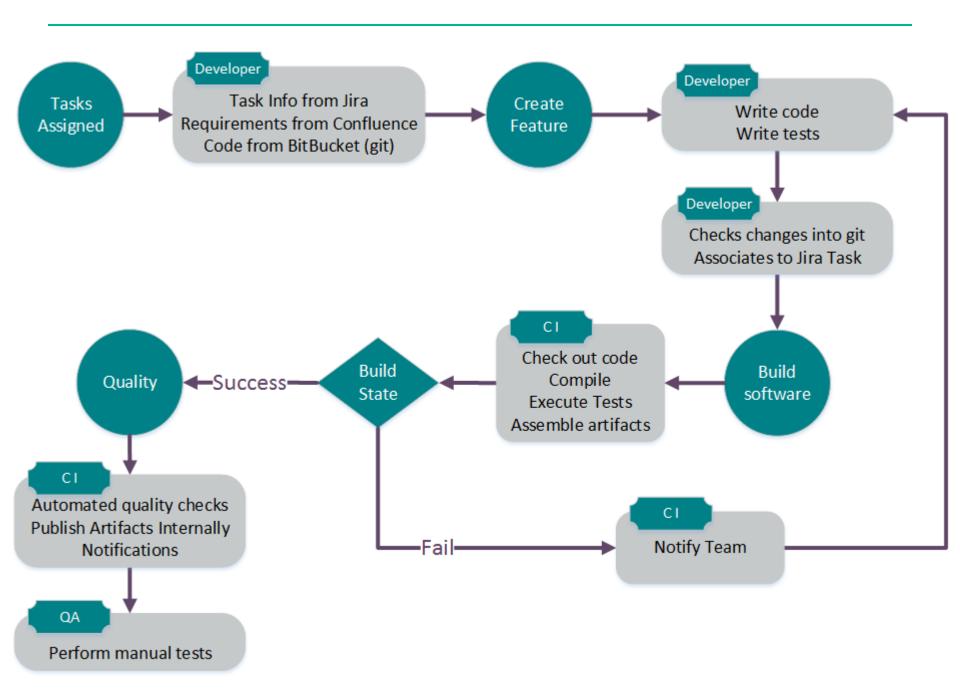

- Multiple Platforms
- Multiple Environments
- App Signing
- Testing
- Deployment
- Release frequency

#### Goals

- Consistency across platforms
- Automation
- Easy for team

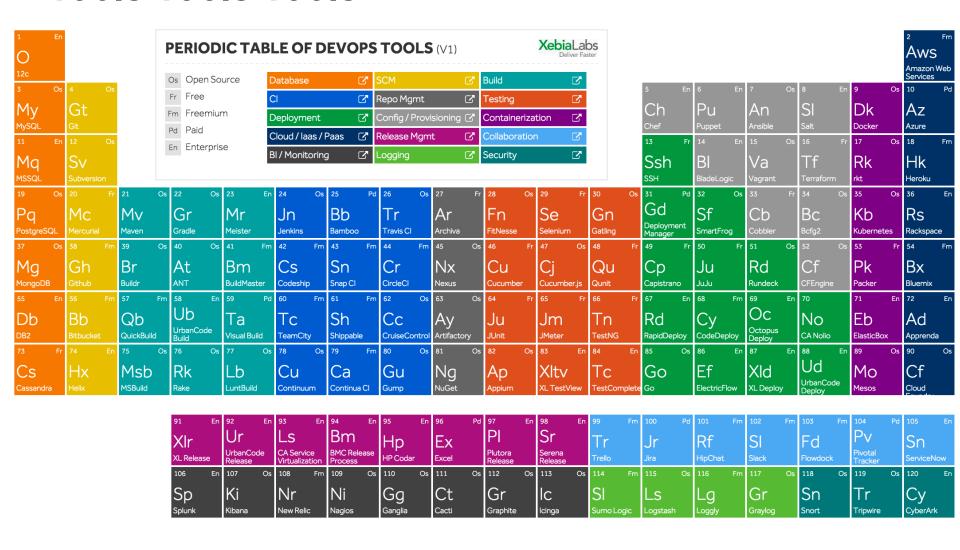

# Tools

#### **Tools Tools**

## **Continuous Integration Server**

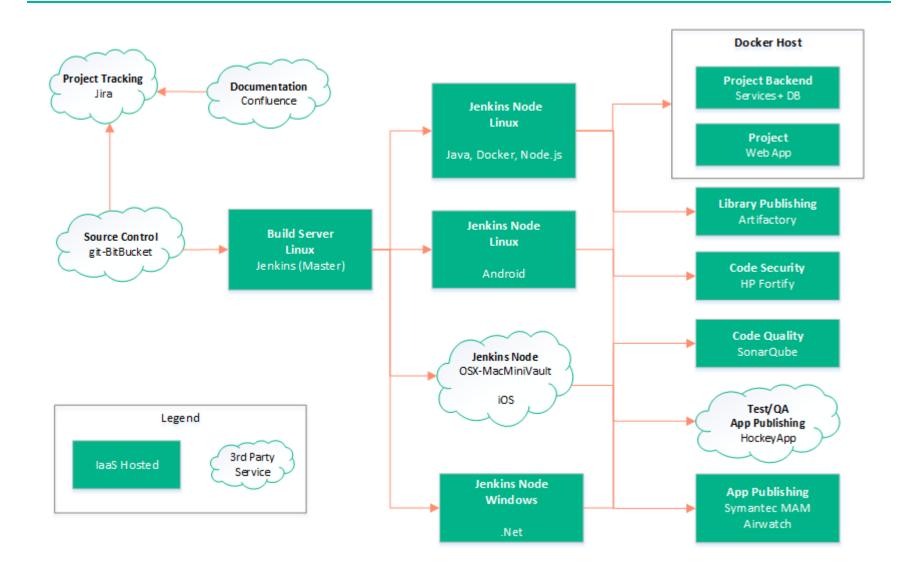

## **Build Scripts**

# **Jenkins Tour**

# **Mobile Nodes**

#### iOS Jenkins Node

- Be reachable from the master
- Create a Jenkins user
- Install Java
  - -Install Gradle
- Install Xcode
- Configure SSH
- Set Permissions

#### **Gradle and iOS**

OpenBakery Gradle Xcode Plugin

http://openbakery.org/gradle.html

# iOS Demo

#### **Android Jenkins Node**

- Be reachable from master
- Install Java
- Install Android SDK
- Configure SSH
- Set Permissions

#### **Android and Gradle**

Build Variants

# **Android Demo**

# **Testing**

## **Automated Testing**

- Unit Tests
- Functional Tests

Calabash

# **Automated Test Demo**

## **Static Code Analysis**

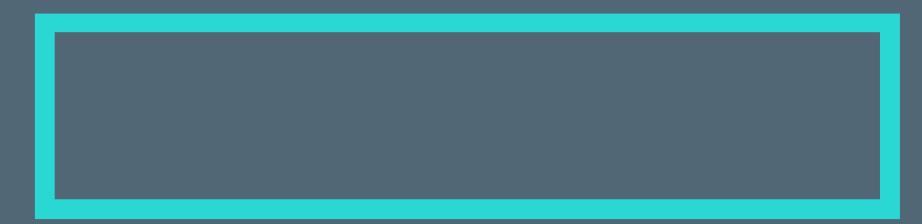

- FindBugs
- Lint tools
  - http://developer.android.com/tools/help/lint.html
  - https://github.com/realm/SwiftLint
  - <a href="https://github.com/jshint/jshint">https://github.com/jshint/jshint</a>
- SonarQube

# **SonarQube Demo**

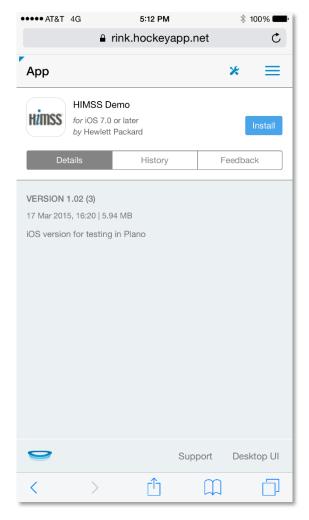

# **Deployment**

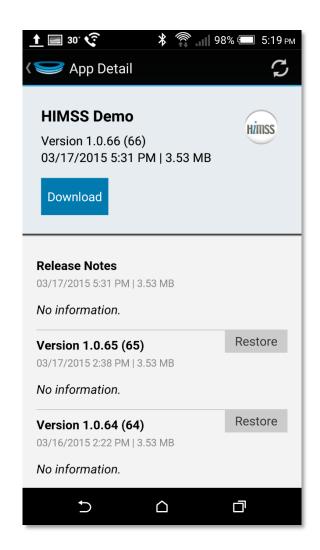

## **Deployment**

# HOCKEYAPP

# HockeyApp - Install

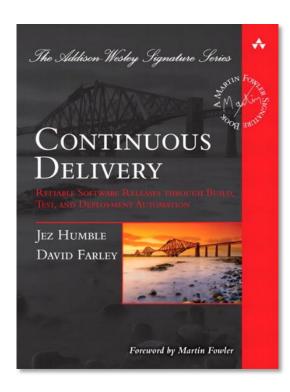

# iOS Deployment
